NEW BRUNSWICK PRESCRIPTION DRUG PROGRAM FORMULARY

Introduction

The New Brunswick Prescription Drug Program Formulary is a listing of all drugs and drug products which have been determined by the Minister of Health and Wellness to be entitled services. Such drugs and drug products must be listed in the New Brunswick Prescription Drug Program Formulary, in order to be considered current eligible benefits. Entitled services which are considered to be interchangeable and available for product selection are noted.

The drugs are listed by Therapeutic Category in accordance with that established by the AHFS Drug Information. Each entry is cross-indexed by trade name, generic name and drug identification number (DIN).

The New Brunswick Prescription Drug Program Formulary is updated quarterly and produced once yearly on compact disc (CD).

Each provider pharmacy and authorized dispensing physician is provided with an electronic copy of the publication on (CD). An electronic copy on CD is available upon request to all physicians registered with Medicare.

An electronic copy in Portable Document Format (PDF) is also maintained on the NBPDP web page; <http://www.gnb.ca/0051/0212/index-e.asp>. To have your name added to the e-mail mailing list to receive an electronic copy, please send a message to BC_nbpdp@atl.bluecross.ca.

New Brunswick Prescription Drug Program

The Prescription Drug Program was established to improve and maintain the well-being of the people of the province by making available specified drugs to selected target groups.

The program is monitored by the Advisory & Utilization Committee which includes representatives of the health care professionals involved, department administration and laypersons. This committee makes recommendations to the Minister of Health and Wellness on the addition and deletion of benefits to the various plans.

New Brunswick Prescription Drug Program Plans

Plans	Fees	Participating Beneficiaries	Legislative Authority
A	\$9.05 per prescription up to an annual copay ceiling of \$250 for GIS recipients. \$15.00 per prescription with no annual ceiling for non-GIS recipients	Eligible residents of the province who are sixty-five years of age or older	Prescription Drug Payment Act and Regulations
B	\$50 per year registration fee ⁽¹⁾ ; 20% of cost of prescription to a maximum of \$20 per prescription up to an annual ceiling of \$500 per family unit	Persons with cystic fibrosis who are eligible residents and registered with the Department of Health and Wellness	Prescription Drug Payment Act and Regulations
E	\$4 per prescription; up to an annual copay ceiling of \$250 per person ⁽²⁾	Persons in licensed residential facilities who are in receipt of financial assistance from the Department of Family & Community Services and hold a valid health card issued by Family & Community Social Services	Health Services Act and Regulations
F	\$4 per prescription for adults (18 years and over) \$2 per prescription for children (under 18 years); up to an annual copay ceiling of \$250 per family unit ⁽²⁾	Family and Community Services clients	Health Services Act and Regulations
G	None	Children in care of the Minister of Health and Wellness and special needs children	Health Services Act and Regulations
H	\$50 per year premium; copay ranges from zero to 100 per cent for each prescription	Persons with multiple sclerosis who are eligible residents and registered with the Department of Health and Wellness	Prescription Drug Payment Act and Regulations
R	\$50 per year registration fee ⁽¹⁾ ; 20% of cost of prescription to a maximum of \$20 per prescription up to an annual ceiling of \$500 per family unit	Solid organ transplant recipients who are eligible residents and registered with the Department of Health and Wellness	Prescription Drug Payment Act and Regulations

New Brunswick Prescription Drug Program Plans

Plans	Fees	Participating Beneficiaries	Legislative Authority
T	\$50 per year registration fee ⁽¹⁾ ; 20% of cost of prescription to a maximum of \$20 per prescription up to an annual ceiling of \$500 per family unit	Persons with growth hormone deficiency who are eligible residents and registered with the Department of Health and Wellness	Prescription Drug Payment Act and Regulations
U	\$50 per year registration fee ⁽¹⁾ ; 20% of cost of prescription to a maximum of \$20 per prescription up to an annual ceiling of \$500 per family unit	HIV-infected persons who are eligible residents and registered with the Department of Health and Wellness	Prescription Drug Payment Act and Regulations
V	None	Eligible residents of Nursing Homes as defined in the Nursing Home Act operated by a licensee under the Act	Prescription Drug Payment Act and Regulations
Special Authorization	Plan dependent ⁽³⁾	Persons approved to have payment made for certain drugs following medical consultation	Prescription Drug Payment Act
Non-NBPDP Plan	Fees	Participating Beneficiaries	Legislative Authority
W	\$9.05 per prescription	Extra Mural Hospital patients who are in possession of a Prescription Drug Authorization Form	Hospital Services Act

(1) Family and Community Services clients are exempted from these fees.

(2) Exempted from these fees for oral contraceptives.

(3) See Appendix IV.

Exclusions

While only products listed in the New Brunswick Prescription Drug Program Formulary are benefits the following are some of the specific products not included:

1. Patent medicines such as Jack and Jill Cough Syrup, Extract of Wild Strawberry, etc.
2. Non-prescription acetylsalicylic acid (ASA) preparations except enteric coated ASA products designated as benefits.
3. Non-prescription mouth, throat and nasal preparations, including decongestants
4. Prescription and non-prescription, Cough and Cold products (antitussives, expectorants and decongestants) except those designated for children in care & Cystic Fibrosis beneficiaries.
5. (a) Non-prescription adult vitamins with or without iron supplements (Plans A, E, F [over 18 years of age]) as a dietary supplement
(b) Multivitamins (prescription and non-prescription) as a dietary supplement
6. Non-prescription tonics and compounded iron preparations (except single entity iron preparations designated as benefits)
7. Dietary/nutritional supplements and food products
8. Artificial sweetening agents
9. Weight loss products (prescription and non-prescription)
10. Calcium preparations (prescription and non-prescription) as a dietary supplement
11. Laxatives (Plans A, E,F and G)
12. Antacids (Plans A only)
13. Smoking cessation products
14. Ergoloid mesylates, oral, (Hydergine)
15. Potassium supplements, oral, when supplied as K-Lyte effervescent tablets, lime or orange flavoured
16. Retinoic acid (eg. Tretinoin) topical and oral preparations (Plan A only)
17. Cosmetic, health, dental and beauty aids, and cosmetic drugs
18. Soaps, cleansers and shampoos, medicated or otherwise
19. Appliances, prosthetic or otherwise, including first aid supplies and syringes

20. Diagnostic agents
21. Household remedies e.g. calamine lotion, iodine, hydrogen peroxide, antiseptics and disinfectants
22. Injectables or other products normally administered in a hospital setting or requiring a health care professional for administration and/or monitoring to ensure the appropriate standard of patient care is provided
23. Any insured service for which the resident is entitled to benefit under Department of Veterans Affairs, Workplace Health & Safety Compensation Commission or other legislation
24. Delivery, postal or C.O.D. charges
25. Refills in excess of the number specified by the physician or any refill of a prescription older than one year unless approved for refill by the prescriber
26. Antihistamines (Plans A, E, F, V and W)
27. Benzoyl Peroxide preparations in strengths of 5% or less.
28. Lactase Enzyme products.
29. All drug products used for the treatment of infertility.
30. Products for the treatment of impotence and sexual dysfunction.
31. Butorphanol nasal spray.

Extemporaneous Preparations

Extemporaneous preparations are defined as a drug or mixture of drugs prepared or compounded in a pharmacy according to the order of a prescriber.

To be eligible as a benefit, extemporaneous preparations must be listed in Appendix III of this publication or:

1. be specifically tailored to a physician's prescription and
2. contain one or more drugs presently considered a benefit and
3. not duplicate the formulation of a manufactured drug product and
4. not contain drugs in the exclusion list

Claims for Extemporaneous Preparations in Appendix III are to be submitted electronically using the PIN assigned to the product. Claims for Extemporaneous Preparations not listed in Appendix III are to be submitted electronically using the DIN of at least one ingredient which is a program benefit. This claim must be identified by entering the appropriate CPhA version 3 code.

Placebos

Placebos, when prescribed as substitutes for benefit products, are normally payable under these programs. This applies particularly to the extemporaneous substitution of inert substances for active ingredients for therapeutic purposes, for example the content of capsules, without the patient's knowledge. In such cases, the pharmacist's claim is to be based on the original product.

When a lower-priced manufactured product is substituted which does not require special preparation, the lower-priced drug becomes the basis for the pharmacist's claim.

No claim may be made if the purpose of a prescription is obviously to substitute a dosage or formulation which is not itself covered by the program; such formulations cannot properly be called placebos.

Claims for placebos must be submitted for reimbursement on the **Special Claim Form** using the DIN "999008". The Program also requires the name, quantity and strength of all the ingredients used in the preparation of each placebo.

Benefit Review Process

All drug products considered for benefit status in the New Brunswick Prescription Drug Program (NBPDP) Formulary are subject to a standard review process.

Since January 2002, all drugs considered for coverage under the NBPDP are reviewed by the Atlantic Expert Advisory Committee (AEAC). The AEAC is comprised of practicing physicians, pharmacists and others with expertise in drug therapy and drug evaluation. The AEAC reviews and evaluates scientific and economic information on new drugs and makes a recommendation to the Atlantic provincial drug programs on whether a drug should be listed as a program benefit, including conditions and/or criteria for coverage. Listing decisions for the NBPDP are determined by the Minister of Health and Wellness.

Pharmaceutical manufacturers, wishing to have a drug product considered for listing as an NBPDP benefit, should provide a complete drug submission to:

Director, Medicare/Prescription Drug Program
Department of Health and Wellness
520 King Street, 4th Floor Carleton Place
P.O. Box 5100
Fredericton, N.B.
E3B 5G8
Phone: (506) 453-8266
Fax: (506) 453-3983

Submissions are accepted on an on-going basis and there are no deadlines. In general, submissions are reviewed in order of receipt of complete submissions.

The submission is reviewed by an external consultant and a drug evaluation report prepared for the AEAC. Manufacturers are charged for the costs incurred by NBPDP for the review of a product. The manufacturer is invoiced for any costs incurred after completion of the review. Cheques for payment of review costs are to be made payable to the Minister of Finance.

Resubmissions can be made if there is new information that has not previously been provided and reviewed. The cover letter of the resubmission should itemize the new information. Manufacturers will be invoiced for any costs associated with the review of a resubmission.

Product Deletion

Authority for deletion of products from the New Brunswick Prescription Drug Program Formulary remains with the Minister of Health and Wellness.

Drug Submission Requirements

The New Brunswick Prescription Drug Program requires one complete copy of the drug submission which must include the following documents:

1. Executive Summary (2 copies)
2. Notice of Compliance (NOC)
3. Product Monograph
4. Therapeutic classifications:
 - American Hospital Formulary Service, Pharmacologic-Therapeutic Classification (PTC) and
 - World Health Organization's Anatomical Therapeutic Chemical (ATC) classification
5. Clinical evidence on efficacy, effectiveness and safety.
 - Double-blind, randomized, controlled trials (RCTs) published in peer-reviewed journals are given the most weight.
 - If unpublished/abstract data is submitted, it must be indicated why it is unpublished.
 - List all studies submitted in one table and specify the study name, date, authors and whether it is published or unpublished.
 - Published articles supporting the validity of outcome measures in studies (if available)
6. Economic Information
 - a. A pharmacoeconomic evaluation is required for most new chemical entities. Studies should follow current guidelines from the Canadian Coordinating Office for Health Technology Assessment (CCOHTA).
 - b. Budget impact analysis
7. Pricing and availability
 - a. Current price for all strengths and dosage forms
 - b. Method of distribution to pharmacies (wholesale, direct or other arrangements)
 - c. Evidence of ability to supply anticipated demand
8. A letter authorizing unrestricted communication regarding the drug product between the New Brunswick Prescription Drug Program and
 - a. Other federal, provincial and territorial (F/P/T) drug programs
 - b. F/P/T health authorities and related facilities
 - c. Health Canada
 - d. Patented Medicine Prices Review Board (PMPRB)
 - e. Canadian Coordinating Office for Health Technology Assessment (CCOHTA)
9. A letter specifying the current or intended Compendium of Pharmaceuticals and Specialties (CPS) listing status.
10. A copy of the Pharmaceutical Advertising Advisory Board (PAAB) approved promotional materials
11. Manufacturers will be invoiced for any costs associated with the review of a drug submission or re-submission.

Legend

1. Pharmacological - therapeutic classification
2. Pharmacological - therapeutic sub-classification
3. Nonproprietary or generic name of the drug
4. Dosage form, route and strength. Strength represents the amount of ingredients present in a solid dose form (Tablet) or in one gram or one millilitre of a preparation (Cream, Liquid, etc.)
5. Brand or manufacturers' product name
6. Drug Identification Number (DIN)
7. Manufacturers' identification code. See Appendix II for an explanation of codes
8. Drug program plans for which the product is considered to be a benefit
9. Indicates that the copay is waived for Plan "E" and Plan "F" prescriptions
10. Indicates that the products are interchangeable
11. Manufacturer has discontinued this product. It will be deleted from the list as a benefit on the date indicated
12. Date of publication

****Ranitidine Hydrochloride is a regular benefit for beneficiaries age 65 and over. Claims for Ranitidine for beneficiaries under age 65, who have had a claim for warfarin, phenytoin, theophylline or cyclosporin within the previous 6 months, will be automatically reimbursed. Physicians may apply for coverage through special authorization for other beneficiaries. Le chlorhydrate de Ranitidine est un médicament assuré habituel pour les bénéficiaires de 65 ans et plus. Les demandes de règlement relatives au Ranitidine pour les bénéficiaires de moins de 65 ans qui ont présenté une demande de règlement pour la warfarine, la phénytoïne, la théophylline ou la cyclosporine au cours des six derniers mois seront remboursés systématiquement. Les médecins peuvent présenter une demande en vertu du processus d'autorisation spéciale pour les autres bénéficiaires.**

APPENDIX IV

SPECIAL AUTHORIZATION

The Prescription Drug Program will consider approving payment for drug products not offered as benefits. Written requests for individuals who are Program beneficiaries for Plans A,B,E,F,G,R,T,V must be sent to the New Brunswick Prescription Drug Program, Special Authorization Unit.

Information on the special authorization request should include the:

- Patient's Medicare number
- Patient's date of birth
- Drug, dosage form and strength
- Expected duration of therapy
- Specific clinical and diagnostic evidence supporting the use of the medication

Part A: Requests for drugs not having defined criteria are reviewed on a case-by-case basis.

Part B: Requests for drugs listed in this appendix are reviewed individually and must meet the defined criteria.

Requests for special authorization should be sent to:

Special Authorization Unit

New Brunswick Prescription Drug Program
P.O. Box 690
644 Main Street
Moncton, New Brunswick
E1C 8M7

Local Fax: 506-867-4872
Toll Free Fax: 1-888-455-8322

Toll Free Inquiry Line: 1-800-332-3691

Please note that **Special Authorization requests for Plan U (HIV - Infected Persons)**, should be sent to:

Director, Medicare/Prescription Drug Program
Department of Health and Community Services
P. O. Box 5100
Fredericton, New Brunswick
E3B 5G8
Tel: (506) 444-5295
Fax: (506) 444-4207

ACARBOSE (PRANDASE)**Tablets 50mg and 100mg**

For non-insulin-dependent diabetes mellitus (NIDDM) patients failing or having contraindications to sulphonylurea and/or biguanide oral hypoglycemics after a reasonable attempt at diet and exercise therapy.

ALENDRONATE (FOSAMAX)**Tablets 10mg and 40mg**

1. For the treatment of Paget's disease.
2. For the treatment of osteoporosis when hormone replacement therapy (HRT) is declined, not tolerated or contraindicated.

Osteoporosis is defined as a bone mineral density (BMD) at least 2.5 standard deviations below the young adult mean (T score ≤ -2.5) and/or the presence of osteoporotic fractures. (World Health Organization definition).

ALENDRONATE (FOSAMAX)**Tablets 70mg**

For the treatment of osteoporosis when hormone replacement therapy (HRT) is declined, not tolerated or contraindicated.

Osteoporosis is defined as a bone mineral density (BMD) at least 2.5 standard deviations below the young adult mean (T score = -2.5) and/or the presence of osteoporotic fractures. (World Health Organization definition).

AMLODIPINE BESYLATE (NORVASC)**Tablets 5mg and 10mg**

1. For the management of angina
2. For the treatment of mild to moderate hypertension patients in whom the use of formulary alternatives is ineffective, not tolerated or contraindicated.

Prescriptions written by New Brunswick internal medicine specialists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

ATOVAQUONE (MEPRON)**Suspension 750mg/5ml**

For the treatment of mild to moderate *Pneumocystis Carinii* pneumonia in beneficiaries who are intolerant to trimethoprim-sulfamethoxazole.

AZITHROMYCIN (ZITHROMAX)**Tablets 600mg**

For the prevention of disseminated Mycobacterium Avium Complex (MAC) in HIV positive patients who are severely immunocompromised with CD4 levels $<0.1 \times 10^9/L$.

BETAHISTINE (SERC)**Tablets 8mg and 16mg**

For the symptomatic treatment of the recurrent episodes of vertigo associated with Ménière's disease.

BOSENTAN (TRACLEER)**Tablets 62.5mg and 125mg**

For treatment of pulmonary arterial hypertension (PAH) in patients with

1. World Health Organization (WHO) functional class III and IV primary pulmonary hypertension (PPH) or
2. Pulmonary hypertension secondary to scleroderma

Who are non responsive to first line therapy (e.g. calcium channel blockers) or have failed a vasodilator test.

BOTULINUM TOXIN TYPE A (BOTOX)**Lyophilized concentrate for injection**

1. Only requests for an approved indication for the product will be considered. The approved indication are:
 - (i) treatment of strabismus and blepharospasm associated with dystonia, including benign essential blepharospasm or VII nerve disorders in patients 12 years of age and above.
 - (ii) cervical dystonia (spasmodic torticollis).
 - (iii) treatment of dynamic equinus foot deformity due to spasticity in pediatric cerebral palsy patients.
2. In the case of strabismus, only requests from ophthalmologists with post-graduate training in the management of strabismus will be considered. Previous experience in the injection of Botox for this indication is desirable.
3. The dose should be consistent with those doses listed in the approved product monograph. In strabismus, the maximum recommended dose as a single injection for any one muscle is 25 U. In blepharospasm, the maximum dose injected per site should not exceed 5.0 units and the cumulative dose in any 30 day period should not exceed 200 U. Treatments should not be repeated more frequently than every 3 months.

4. Treatments should be administered in a hospital outpatient setting with adequate provision for the management of anaphylactic reactions.
5. Requests must show that arrangements have been made with an accredited pharmacy (hospital or community) for the procurement of Botox and storage of the product in a freezer at or below -5°C . A licensed pharmacist should be available to reconstitute the product for injection under aseptic conditions.
6. Requests must show that arrangements have been made with the hospital to dispose of unused Botox and injection equipment in the same manner used for other hazardous medical wastes.

BUPROPION HYDROCHLORIDE (WELLBUTRIN SR)
Sustained Release Tablets 100mg and 150mg

For the symptomatic relief of depressive illness.

Prescriptions written by New Brunswick psychiatrists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

BUSERELIN ACETATE (SUPREFACT)
Nasal solution 1mg/ml

Approved for the palliative treatment of stage D₂ carcinoma of the prostate (Plan F beneficiaries).

CALCITONIN SALMON (MIACALCIN)
Nasal spray 200 IU

1. For the treatment of osteoporosis when hormone replacement therapy (HRT) is declined, not tolerated or contraindicated, and alendronate, risedronate and raloxifene have failed, are not tolerated or are contraindicated.

Osteoporosis is defined as a bone mineral density (BMD) at least 2.5 standard deviations below the young adult mean (T score ≤ -2.5) and/or the presence of osteoporotic fractures. (World Health Organization definition).

2. For pain associated with osteoporotic fragility fractures, bone metastases, pathological fractures (short-term coverage of up to 12 weeks).

CANDESARTAN (ATACAND)
Tablets 8mg and 16mg

For the treatment of hypertension in patients who require an ACE Inhibitor but cannot tolerate it due to side effects.

CAPECITABINE (XELODA)

Tablets 150mg and 500mg

For single agent treatment of patients who have metastatic colorectal cancer, with an ECOG performance status of 0-2*, when first line combination chemotherapy (5-FU/ leucovorin/irinotecan) is declined or not tolerated. Requests will be considered for patients who are chemotherapy naive or patients who have progressed 6 months after completion of adjuvant 5-FU/ leucovorin therapy.

Must be prescribed by specialists in oncology. Approvals will be granted for up to 6 months at a time.

* Patients who are asymptomatic and those who are symptomatic and in bed less than 50% of the time.

CARVEDILOL (COREG)

Tablets 3.125mg, 6.25mg, 12.5mg and 25mg.

Requests will be considered for the treatment of stable symptomatic congestive heart failure (CHF) on the recommendation of a cardiologist/internist.

Prescriptions written by cardiologists or internists do not require special authorization.

CELECOXIB (CELEBREX)

Capsules 100mg and 200mg

For the treatment of osteoarthritis and rheumatoid arthritis in patients who have at least one of the following factors:

- Past history of ulcers
- Concurrent warfarin therapy
- Concurrent prednisone therapy
- Failure or intolerance to at least two other NSAIDs (e.g. ibuprofen, diclofenac, naproxen)

Recommended maximum daily doses: 200mg for osteoarthritis
400mg for rheumatoid arthritis

Note: Celecoxib is a regular benefit for beneficiaries age 65 and over (Plans A and V).

CIPROFLOXACIN (CIPRO)

Tablets 250mg, 500mg and 750mg Oral Suspension 500mg/mL

For the treatment of:

- Complicated urinary tract infections caused by resistant bacteria.
- Skin, soft tissue, bone and joint infections caused by Gram negative bacteria.
- Severe (“malignant”) otitis externa.
- Infections with *Pseudomonas aeruginosa* (susceptible strains – resistance is now common).
- Selected patients with acute exacerbation of chronic bronchitis with risk factors

Risk factors include:

- poor pulmonary lung function (FEV₁ below 50% predicted)
- age over 65
- comorbid medical illness (CHF, DM, CRF, chronic liver disease)
- chronic steroid use
- antibiotic use in previous three months
- malnutrition
- prolonged duration of disease
- 4 or more exacerbations per year

Prescriptions written by New Brunswick urologists, infectious disease specialists, medical oncologists, hematologists, respiratory medicine specialists or medical microbiologists will not require special authorization.

CLOPIDOGREL (PLAVIX)

Tablets 75mg

1. Secondary prevention of vascular ischemic events (myocardial infarction, stroke) in patients with a history of symptomatic atherosclerotic disease who have had treatment failure or are intolerant or allergic to ASA.
2. For the prevention of thrombosis post intracoronary stent implantation for a period of 28 days. Prescriptions written by invasive (interventional) cardiologists for this procedure do not require special authorization. The claims adjudication system will automatically recognize the NBPDP physician ID number of the cardiologists at the Atlantic Health Sciences Centre.
3. For the prevention of vascular ischemic events in patients who have been hospitalized with acute coronary syndrome (i.e. unstable angina or non-ST segment elevation myocardial infarction) in combination with ASA for a period of three months.

CLOZAPINE (CLOZARIL)

Tablets 25mg and 100mg

1. Clozapine is indicated for the management of treatment-resistant schizophrenia. Requests will be considered for beneficiaries who are non-responsive to, or intolerant of, conventional anti-psychotic drugs.

a) non-responsiveness is defined as a lack of satisfactory clinical response, despite treatment with the appropriate courses of maximum tolerated therapeutic doses of at least two chemically-unrelated anti-psychotics.

b) intolerance is defined as the inability to achieve adequate benefit with conventional anti-psychotics because of dose-limiting, intolerable adverse effects such as parkinsonism, dystonia, akathisia and tardive dyskinesia.

2. Dosage and administration: Clozapine treatment must be initiated on an in-patient basis or in an out-patient setting where medical supervision is available and vital signs can be monitored.

When treatment is initiated in out-patients, special caution is advised in patients who are receiving benzodiazepines or other psychotropic drugs as these patients may have an increased risk of circulatory collapse accompanied by respiratory and/or cardiac arrest (see Drug Interactions). Extra caution is advised in patients with cardiovascular disease or a history of seizures (See Warnings in monograph). The dosage of Clozapine must be adjusted individually. For each patient the lowest effective dose should be used.

3. Informed consent from Clozapine patients or their legal guardian must be obtained and a signed copy must be sent to the Prescription Drug Program with the application for Special Authorization.
4. Documentation showing that arrangements have been made for haematological monitoring must accompany each application. Send a copy of (CSAN) Form 2.
5. Patients must be enrolled in Clozaril Support and Assistance Network (CSAN). Send a copy of (CSAN) Form 1 and (CSAN) Letter of Approval.
6. Requests must be received from a psychiatrist. Prescriptions written by New Brunswick psychiatrists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

CYPROTERONE ACETATE (ANDROCUR and generic brands)

Tablets 50mg

1. Special authorization is not required for initial coverage. Coverage for beneficiaries of Plans A, E, F, V, W will be available for a 2 year period commencing the date of the beneficiary's first claim for this product.
2. The value of continued anti-androgen therapy in patients with evidence of disease relapse and progression is questionable. Since the mean time to disease progression after initial hormone management is approximately two years, Special Authorization must be obtained for continuation beyond this period. This should include urologic evaluation detailing physician examination, PSA determinations, and bone scan or acid phosphatase where appropriate.
3. The continued use of this medication would require such authorization every two years if the patient is to remain on the medication.

**DIPYRIDAMOLE EXTENDED RELEASE/ASA IMMEDIATE RELEASE
(AGGRENOX)**

Capsules 200mg/25mg

For the secondary prevention of ischemic stroke/TIA in patients who have experienced a recurrent thrombotic event (stroke, symptoms of TIA) while taking ASA.

EPOETIN ALFA (EPREX)

Liquid Inj Sc. 1000IU/0.5ml, 2000IU/0.5ml, 3000IU/0.3ml, 4000IU/0.4ml, 6000IU/.6ml, 8000IU/.8ml, 10000IU/ml and 20000IU/ml

1. Treatment of anemia associated with chronic renal failure. Note: patients on dialysis (end-stage renal disease) receive epoetin through the dialysis units.
2. Treatment of transfusion dependent anemia related to therapy with zidovudine in HIV-infected patients

EPROSARTAN MESYLATE (TEVETEN)

Tablets 300mg, 400mg and 600mg

For the treatment of hypertension in patients who require an ACE Inhibitor but cannot tolerate it due to side effects.

ESTRADIOL-17b (VIVELLE) (ESTRADOT)

Transdermal Patches 37.5mcg, 50mcg, 75mcg and 100mcg

For the treatment of menopausal symptoms in women for whom oral forms of HRT are not tolerated or indicated.

ETANERCEPT (ENBREL)
Liquid Injection 25mg
Rheumatoid Arthritis

Must be prescribed by a rheumatologist.

For the treatment of patients with active rheumatoid arthritis who:

- Have not responded to, or have had intolerable side-effects with, an adequate trial of combination traditional DMARD (disease modifying antirheumatic drug) therapy. Combination DMARD therapy must include methotrexate unless contraindicated or not tolerated, OR
- Are not candidates for combination DMARD therapy must have had adequate trial of at least three traditional DMARDs in sequence, one of which must have been methotrexate unless contraindicated

AND

- Have had an adequate trial of leflunomide unless it is contraindicated or not tolerated.

FAMCICLOVIR (FAMVIR)
Tablets 500mg

For the treatment of acute herpes zoster (shingles): 500mg TID x 7 days.

- Therapy should be initiated within 72 hours of onset of rash. The drug has little benefit if started after 72 hours.

Prescription claims submitted by pharmacies which meet the following conditions are automatically reimbursed and do not require special authorization.

- Beneficiaries 50 years of age and older. Persons in this age group have a higher incidence of post-zoster pain.
- Annual quantity limit of 10, 500mg (21 doses of 500mg).

FENTANYL TRANSDERMAL (DURAGESIC)
Patches 25mcg/hr, 50mcg/hr, 75mcg/hr and 100mcg/hr

1. An alternative analgesic for use in cancer pain management where oral drug administration is not possible or is not practical.
2. Where it can be demonstrated that adequate alternative analgesics have been used unsuccessfully and that Duragesic is being considered as an alternative to continuous parenteral infusion of narcotics.

FILGRASTIM (NEUPOGEN - AMGEN)
Injection 300mcg/1mL, 480mcg/1.6mL

GENERAL

Filgrastim must be prescribed or requested by a certified hematologist or medical oncologist.

1. USE FOR CHEMOTHERAPY SUPPORT

a) Primary prophylaxis:

For use in previously untreated patients receiving a moderate to severely myelosuppressive chemotherapy regimen (i.e. $\geq 40\%$ incidence of febrile neutropenia). Febrile neutropenia is defined as a temperature $\geq 38.5^{\circ}\text{C}$ or $> 38^{\circ}\text{C}$ three times in a 24 hour period and neutropenia with an absolute neutrophil count (ANC) $< 0.5 \times 10^9/\text{L}$.

b) Secondary prophylaxis:

- For use in patients receiving myelosuppressive chemotherapy who have experienced an episode of febrile neutropenia, neutropenic sepsis or profound neutropenia in a previous cycle of chemotherapy; or
- For use in patients who have experienced a dose reduction or treatment delay longer than one week, due to neutropenia.

c) Dosing for Chemotherapy support:

The manufacturer recommends an initial dose of 5mcg/kg/day. When dose scavenging techniques are not available, the following recommendations are suggested:

- Patients ≤ 70 Kg use 1 ml vial (300mcg) DIN 01968017
- Patients > 70 Kg use 1.6 ml vial (480mcg) PIN 00999001

2. USE FOR NON-MALIGNANT INDICATIONS

- a) Treatment of congenital neutropenia, idiopathic neutropenia or cyclic neutropenia in patients with recurrent clinical infections.
- b) Drug-induced neutropenia (e.g. antiviral therapy in patients with HIV).
- c) Refer to product monograph for dosing recommendations.

3. USE IN STEM-CELL TRANSPLANTATION

a) Mobilization:

As an adjunct to progenitor cell transplantation, for mobilization of peripheral blood stem cells (PBSC). The recommended dosage is 10mcg/kg/day.

b) Reconstitution/Engraftment:

Post bone marrow transplantation (BMT) or PBSC transplantation to speed hematopoietic reconstitution. The recommended dosage is 5mcg/kg/day.

4. UNACCEPTABLE USE

Treatment of febrile neutropenia or in the prevention of febrile neutropenia in the palliative setting.

FINASTERIDE (PROSCAR)

Tablets 5mg

1. Finasteride is indicated for the treatment of symptomatic benign prostatic hyperplasia.
 - a) Requests will be considered for beneficiaries whose symptoms are sufficiently severe to be considered surgery including those patients who are a poor surgical risk.
 - b) Finasteride is not indicated for those patients who are candidates for immediate surgery.
2. Unless the request is from a urologist, it must show that:
 - a) urological evaluation has been carried out.
 - b) PSA level has been verified prior to starting Proscar (unless a reason is provided for not doing so, i.e. age, pre-existing medical condition).
3. Initial approval limits payment to a maximum of 6 months which can be renewed at the request of the physician upon determination of clinical response.

FLUTAMIDE (EUFLEX and generic brands)

Tablets 250mg

1. Special Authorization is not required for initial coverage. Coverage for beneficiaries of Plans A, E, F, V, and W will be available for a 2 year period commencing the date of the beneficiary's first claim for this product.
2. The value of continued anti-androgen therapy in patients with evidence of disease relapse and progression is questionable. Since the mean time to disease progression after initial hormone management is approximately two years, Special Authorization must be obtained for continuation beyond this period. This should include urologic evaluation detailing physician examinations, PSA determinations, and bone scan or acid phosphatase where appropriate.
3. The continued use of this medication would require such authorization every 2 years if the patient is to remain on the medication.

FORMOTEROL (FORADIL)

Dry Powder for Inhalation 12 µg

Indicated in patients, 12 years of age or older, with reversible obstructive airway disease who are using optimal corticosteroid treatment, but are still poorly controlled.

FORMOTEROL (OXEZE)

Turbuhaler 12 µg

Indicated in patients, 12 years of age or older, with reversible obstructive airway disease who are using optimal corticosteroid treatment, but are still poorly controlled.

FOSFOMYCIN TROMETHAMINE (MONUROL)

Sachets (single dose) 1 gram

For the treatment of acute uncomplicated urinary tract infections:

1. In which micro-organisms are resistant to first line agents, or
2. In patients who have an allergy or contraindication to first line agents

GABAPENTIN (NEURONTIN and generic brands)

Capsules 100mg, 300mg and 400mg

1. For the treatment of refractory epilepsy not well controlled with conventional therapy.
2. Not intended for monotherapy.

GANCICLOVIR (CYTOVENE)

Capsules 250mg

For maintenance treatment of CMV retinitis in immunocompromised patients where the retinitis is stable following at least 3 weeks of therapy with intravenous ganciclovir.

GOSERELIN ACETATE (ZOLADEX)

Depot S.C. 3.6mg

1. Requests will be considered for beneficiaries of Plans E and F for the palliative treatment of stage D₂ carcinoma of the prostate.
 - (i) The value of continued anti-androgen therapy in patients with evidence of disease relapse and progression is questionable. Since the mean time to disease progression after initial hormone management is approximately two years, Special Authorization must be obtained for continuation beyond this period. This should include urologic evaluation detailing physical examination, PSA determinations, and bone scan or acid phosphatase where appropriate.
 - (ii) The continued use of this medication would require such authorization every two years if the patient is to remain on the medication.
2. Approved for the hormonal management of endometriosis, including pain relief and reduction of endometriotic lesions. Requests will be considered for women age 18 and older. Approval limits payment to a maximum of 6 months of therapy.

Hp-PAC (Containing LANSOPRAZOLE Cap 30mg, AMOXICILLIN Cap 500mg, CLARITHROMYCIN Tab 500mg)

H. pylori positive patients with peptic ulcer disease (PUD);

- A one-time prescription for an Hp-PAC (lansoprazole, amoxicillin, clarithromycin) as an approved *H. pylori* eradication regimen (see table of *H. pylori* regimens under proton pump inhibitors) will be reimbursed for PDP patients without requiring a Special Authorization request.
- The one time prescription will be limited up to a maximum of 7 days of therapy (7 blister cards). This will allow for a 7 day eradication regimen.

**IMIQUIMOD (ALDARA)
Cream 5%**

For the treatment of external genital and external perianal/condyloma acuminata warts.

**INFLIXIMAB (REMICADE)
Liquid Injection 100mg
Rheumatoid Arthritis**

Must be prescribed by a rheumatologist.

For the treatment of patients with active rheumatoid arthritis who:

- Have not responded to, or have had intolerable side-effects with, an adequate trial of combination traditional DMARD (disease modifying antirheumatic drug) therapy. Combination DMARD therapy must include methotrexate unless contraindicated or not tolerated, OR
- Are not candidates for combination DMARD therapy must have had adequate trial of at least three traditional DMARDs in sequence, one of which must have been methotrexate unless contraindicated

AND

- Have had an adequate trial of leflunomide unless it is contraindicated or not tolerated.

INFLIXIMAB (REMICADE)
Liquid Injection 100mg
Crohn's Disease

Must be prescribed by, or in consultation with, a gastroenterologist or physician with a specialty in gastroenterology.

Severe active Crohn's Disease

Requests will be considered for treatment of patients refractory to therapy with EACH of the following:

- 5-ASA products-minimum trial of 3 grams per day for 6 weeks AND
- Glucocorticosteroids - including steroid dependent disease AND
- Immunosuppressive therapy - azathioprine, 6-mercaptopurine or methotrexate for minimum 3 months*

Initial approval will be for a single 5 mg/kg dose. A second infusion may be considered for patients not responding to the first infusion, or in patients initially responsive but worsening before maintenance therapy is effective.

Fistulizing Crohn's Disease

Requests will be considered for patients with actively draining perianal or enterocutaneous fistula(e) that have occurred or persisted despite:

- Antibiotic therapy with metronidazole +/- ciprofloxacin for a minimum of 3 weeks AND
- Immunosuppressive therapy with azathioprine, 6-mercaptopurine or methotrexate for minimum of 6 weeks*

Initial approval will be for three doses of 5mg/kg dose at 0, 2 and 6 weeks.

* Patients who are very ill and not candidates for surgery may qualify for infliximab therapy without a trial of AZA, 6-MP or MTX as they may require a more rapid onset of response. Contraindications or serious adverse reactions limiting the use of any of the above therapies should be noted on the request for coverage.

INSULIN ASPART (NOVORAPID)
100unit vial and penfill

For patients with type I or II diabetes who have experienced frequent episodes of postprandial hypoglycemia; have unpredictable mealtimes; have insulin resistance; or who are using continuous subcutaneous insulin infusion.

Prescriptions written by New Brunswick endocrinologists and internists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

INSULIN LISPRO (HUMALOG)**10ml Vials, 5x1.5ml cartridges and 5x3ml cartridges**

For patients with type I or II diabetes who have experienced frequent episodes of postprandial hypoglycemia; have unpredictable mealtimes; have insulin resistance; or who are using continuous subcutaneous insulin infusion.

Prescriptions written by New Brunswick endocrinologists and internists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

IRBESARTAN (AVAPRO)**Tablets 75mg, 150mg and 300mg**

For the treatment of hypertension in patients who require an ACE Inhibitor but cannot tolerate it due to side effects.

LAMIVUDINE (HEPTOVIR)**Tablets 100 mg and Solution 5mg/mL**

For the treatment of patients with chronic hepatitis B with evidence of hepatitis B replication, defined as:

- 1) HBsAg positive for at least 6 months
- 2) Evidence of active viral replication (HBeAg positive)
- 3) ALT level elevated on at least 3 consecutive occasions over a 3 month period.

Prescriptions written by New Brunswick internal medicine specialists do not require special authorization.

LAMOTRIGINE (LAMICTAL and generic brands)**Tablets 25mg, 100mg and 150mg and Chewable Tablets 5mg**

1. For the treatment of refractory epilepsy not well controlled with conventional therapy.
2. As adjunctive therapy for the management of the seizures associated with Lennox-Gastaut syndrome.

LANSOPRAZOLE (PREVACID)**Tablets 15mg and 30mg**

See criteria under Proton Pump Inhibitors

LATANOPROST (XALATAN)

Liquid Ophthalmic 0.005%

For the reduction of intraocular pressure in patients with open angle glaucoma or ocular hypertension who are intolerant of, or insufficiently responsive to, another IOP lowering drug.

Xalatan (latanoprost) is available as a conditional benefit for Plans A, F+18,V if the beneficiary has had a previous claim for a first-line glaucoma agent. When a claim is submitted, the system will check the beneficiary's history for the previous 12 months. If a claim for a product in ATC "S01E" is found (eg. betaxolol, levobunolol, timolol etc.), the claim for Xalatan will be reimbursed.

LEFLUNOMIDE (ARAVA)

Tablets 10mg, 20mg and 100mg

For the treatment of patients with active rheumatoid arthritis who have not responded to, or have had intolerable toxicity with, an adequate trial of combination traditional DMARD (disease modifying antirheumatic drug) therapy. Combination DMARD therapy must include methotrexate unless contraindicated or not tolerated.

Patients who are not candidates for combination DMARD therapy must have had adequate trial of at least three traditional DMARDs in sequence, one of which must have been methotrexate unless contraindicated.

LEUPROLIDE (LUPRON & LUPRON DEPOT)

Injection 5mg and Depot 7.5mg (1-month Slow Release)

Requests will be considered for beneficiaries of Plans E and F for the palliative treatment of stage D₂ carcinoma of the prostate.

1. (i) The value of continued anti-androgen therapy in patients with evidence of disease relapse and progression is questionable. Since the mean time to disease progression after initial hormone management is approximately two years, Special Authorization must be obtained for continuation beyond this period. This should include urologic evaluation detailing physical examination, PSA determinations, and bone scan or acid phosphatase where appropriate.
(ii) The continued use of this medication would require such authorization every two years if the patient is to remain on the medication.
2. For the treatment of central precocious puberty.

LEUPROLIDE (LUPRON DEPOT)
Injection 3.75mg (1-month Slow Release)

1. For the hormonal management of endometriosis, including pain relief and reduction of endometriotic lesions. Requests will be considered for women age 18 and older. Approval limits payment to a maximum of 6 months of therapy.
2. For the treatment of central precocious puberty.

LEUPROLIDE (LUPRON DEPOT)
Injection 11.25mg (3-month Slow Release)

For the hormonal management of endometriosis, including pain relief and reduction of endometriotic lesions. Requests will be considered for women age 18 and older. Approval limits payment to a maximum of 6 months of therapy.

LINEZOLID (ZYVOXAM)
Tablets 600mg

- For treatment of proven vancomycin-resistant *enterocci* (VRE) infections.
- For the treatment of proven methicillin-resistant *Staphylococcus aureus* (MRSA) / methicillin-resistant *Staphylococcus epidermidis* (MRSE) infections in patients who are unresponsive to, or intolerant of, intravenous vancomycin or in whom intravenous vancomycin is not appropriate.

The drug must be prescribed by, or in consultation with, an infectious disease specialist or medical microbiologist.

LOSARTAN (COZAAR)
Tablets 25mg, 50mg and 100mg

For the treatment of hypertension in patients who require an ACE Inhibitor but cannot tolerate it due to side effects.

NAFARELIN ACETATE (SYNAREL)
Nasal Solution 2mg/ml

Approved for the hormonal management of endometriosis, including pain relief and reduction of endometriotic lesions. Requests will be considered for women age 18 and older. Approval limits payment to a maximum of 6 months of therapy.

NALTREXONE (REVIA)

Tablets 50mg

1. Treatment of alcohol dependence: Naltrexone is indicated in the treatment of alcohol dependence, as an adjunct to a comprehensive Psychotherapeutic or psychological alcoholism counselling program to support abstinence, and reduce the risk of relapse.
2. Treatment of opioid dependence: Naltrexone is indicated for the maintenance of opiate-free state in individuals who were previously opiate-dependent but have successfully completed detoxification. Treatment should not be attempted until the patient has remained opioid-free for 7 - 10 days. The drug is reported to be of greatest use in good prognosis narcotic addicts who take the drug as part of a comprehensive occupational rehabilitative program, behavioural contract, or other compliance enhancing protocols. There are no data that demonstrate an unequivocally beneficial effect of Naltrexone on the rates of recidivism among detoxified formerly opioid-dependent individuals, who self administer the drug.

Requests for Naltrexone will be considered for patients participating in a comprehensive treatment program. In the event that a patient participates in a program other than those offered by the Regional Addiction Services, details on the type of counselling/supportive program the patient will be involved in will be requested.

The program will authorize a total quantity of no more than 12 weeks initially. In order to monitor the patient compliance with the treatment program, reimbursement of individual prescriptions will be limited to a two week supply for the first 12 weeks.

Further reimbursement will require information on the outcome of therapy as well as patient's compliance rate with treatment programs.

NARATRIPTAN (AMERGE)

Tablets 1mg and 2.5mg

1. For the treatment of migraine headache where patients have a definite diagnosis of migraine with or without aura based on the current Canadian guidelines.
2. The initial approval for persons not previously treated with a 'triptan' will be limited to a quantity equal to three days of therapy per month at the maximum dose for two months. If therapy has been successful, special authorization could be renewed for a period of up to 12 months.

Note: Patients experiencing three or more severe migraine attacks in one month should be considered for migraine prophylaxis therapy.

Special authorization for the products naratriptan 1mg and 2.5mg tablets, sumatriptan 100mg tablets, sumatriptan 20mg nasal spray and zolmitriptan 2.5mg tablets will be considered as a set. Approvals will include all products in this list, however reimbursement will be available for a maximum quantity of one agent per month.

NILUTAMIDE (ANANDRON)

Tablets 50mg and 100mg

1. Special Authorization is not required for initial coverage. Coverage for beneficiaries of Plans A, E, F, V and W will be available for a 2 year period commencing the date of the beneficiary's first claim for this product.
2. The value of continued anti-androgen therapy in patients with evidence of disease relapse and progression is questionable. Since the mean time to disease progression after initial hormone management is approximately two years, Special Authorization must be obtained for continuation beyond this period. This should include urologic evaluation detailing physician examination, PSA determinations, and bone scan or acid phosphatase where appropriate.
3. The continued use of this medication would require such authorization every two years if the patient is to remain on the medication.

NORETHINDRONE ACETATE / ESTRADIOL-17b (ESTALIS) (ESTALIS-SEQUI)

Transdermal patches 140/50mcg and 250/50mcg

For the treatment of menopausal symptoms in women for whom oral forms of HRT are not tolerated or indicated.

OCTREOTIDE ACETATE (SANDOSTATIN)

Injection 50mcg, 100mcg, 500mcg ampoules and 200mcg multi-dose vial

1. For the control of symptoms associated with metastatic carcinoid and vasoactive intestinal peptide-secreting tumors (VIPomas).
2. For the treatment of acromegaly.

OCTREOTIDE ACETATE (SANDOSTATIN LAR)

Injection 10mL vials, 10mg, 20mg and 30mg

For the treatment of acromegaly.

OLANZAPINE (ZYPREXA)

Tablets 2.5mg, 5mg, 7.5mg and 10mg

OLANZAPINE (ZYPREXA ZYDIS)

Tablets 5mg and 10mg

For the acute and maintenance treatment of schizophrenia and related psychotic disorders. Advice from a psychiatrist is suggested prior to starting therapy.

Prescriptions written by New Brunswick psychiatrists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

OMEPRAZOLE (LOSEC)

Tablets 20mg

See criteria under Proton Pump Inhibitors

ONDANSETRON (ZOFTRAN)

Tablets 4mg and 8mg

1. Only requests for the oral tablets are eligible for consideration.
2. Eligible patients are approved adults or pediatric beneficiaries of the New Brunswick Prescription Drug Program who:
 - (a) are receiving a course of highly emetogenic chemotherapy (i.e. contains cisplatin) or moderately emetogenic chemotherapy (i.e. contains cyclophosphamide, doxorubicin, epirubicin, melphalan) and,
 - (b) have experienced adverse effects to metoclopramide, prochlorperazine or dexamethasone or have a specific contraindication which does not allow use of these drugs as antiemetics or,
 - (c) have had continued episodes of nausea and vomiting related to chemotherapy which have not responded to therapeutic doses of metoclopramide, dexamethasone or prochlorperazine.
3. Other drug and non-drug causes or pre-existing nausea and vomiting should be identified and eliminated.
4. The dose and duration of therapy approved will be:
Children (ages 4-12): 4mg Q8H for up to 5 days post-chemotherapy
Adults: 8mgQ8H for up to 5 days post-chemotherapy
5. Duration of approval will be for the full course of the chemotherapy regimen

OXYBUTYNIN XL (DITROPAN XL)

Tablets 5mg and 10mg

For the treatment of urinary frequency, urgency, or urge incontinence in patients who have discontinued oxybutynin immediate release due to intolerable side effects.

OXYCODONE (OXY IR)

Tablets (immediate release) 5mg, 10mg and 20mg

For the treatment of moderate to severe cancer-related or chronic non-malignant pain.

OXYCODONE (OXYCONTIN CR)

Tablets (controlled release) 10mg, 20mg, 40mg and 80mg

For the treatment of moderate to severe cancer-related or chronic non-malignant pain.

PANTOPRAZOLE (PANTOLOC)

Tablets 40mg

See criteria under Proton Pump Inhibitors

PIOGLITAZONE (ACTOS)

Tablets 15mg, 30mg and 45mg

For patients with type 2 diabetes who are not adequately controlled by diet, exercise and drug therapy. Drug therapy should include a trial of a sulfonylurea and metformin, alone and in combination, unless one of these agents is not tolerated or is contraindicated.

Note: The actual acquisition cost of once daily rosiglitazone (Avandia) is less than the cost of once daily pioglitazone (Actos). Twice daily dosing of Avandia is significantly more costly than once daily dosing of either drug.

PROTON PUMP INHIBITORS (Lansoprazole, Omeprazole, Pantoprazole, Rabeprazole)

Indication	Diagnostic Information	Maximum Approval Period
A: Gastro-esophageal Reflux Disease (GERD)	Requests for patients with endoscopic evidence of erosive or ulcerative esophagitis or Barrett’s esophagus	Considered for long term approval
	Requests for patients with severe symptoms who have not responded to an adequate trial of lifestyle modification, antacids and a 6-8 week trial of H ₂ RA	Considered for short-term (8 –12 weeks) approval
	Requests for patients who have had recurrence of severe symptoms related to GERD, on a retrial of H ₂ RA maintenance therapy (after initial short term course of PPI)	Considered for a one year approval
B: Zollinger-Ellison Syndrome	Requests for patients with Zollinger-Ellison syndrome	Considered for long-term approval
C: Peptic Ulcer Disease (PUD) i) <i>H. pylori</i> positive patients with PUD	A one-time prescription for a PPI as part of an approved <i>H. pylori</i> eradication regimen (see Table of <i>H. pylori</i> regimens) will be reimbursed for PDP patients without requiring a SA.	The one time prescription will be limited to a maximum of 14 tabs/caps of the appropriate strength PPI. (This will allow for a 7-day eradication regimen). Pharmacists must submit a PPI claim intended for <i>H. pylori</i> eradication subsequent to an Amoxicillin or a Metronidazole prescription. Claims for conditional benefit drugs must be submitted on the same day, by the same pharmacy and with the same prescriber code.
	Special authorization requests for a PPI for documented treatment failure or <i>H. pylori</i> recurrence will be considered for <i>H. pylori</i> positive patients.	Considered for one treatment course. Written special authorization request required. Claims made without special authorization will be rejected with message “patient is over quantity limit”.
	ii) <i>H. pylori</i> negative patients with PUD	For patients with a documented gastric or duodenal ulcer who are <i>H. pylori</i> negative and have not responded to a 6 to 8 week trial of H ₂ RA therapy
New Brunswick Gastroenterologists do not require special authorization to obtain reimbursement of a proton pump inhibitor for any indication.		

Table 1. *H. pylori* Eradication Regimens which NBPDP will reimburse.

Drugs	Dosage & Duration
Amoxicillin 1gram Clarithromycin 500 mg PPI ⁽¹⁾	BID x 7 days
Metronidazole 500 mg Clarithromycin 250 mg PPI ⁽²⁾	BID x 7 days
Bismuth subsalicylate 30 mL or 2 tabs Metronidazole 250 mg Tetracycline 500 mg Omeprazole 20 mg or Lansoprazole 30mg	QID QID QID BID x 7days

⁽¹⁾ Proton Pump Inhibitors: Omeprazole 20 mg, Lansoprazole 30 mg, Pantoprazole 40 mg or Rabeprazole 20mg

⁽²⁾ Proton Pump Inhibitors: Omeprazole 20 mg, Lansoprazole 30 mg, Pantoprazole 40 mg

QUETIAPINE (SEROQUEL)

Tablets 25mg, 100mg, 150mg, 200mg and 300mg

For the management of the manifestations of schizophrenia. Advice from a psychiatrist is suggested prior to starting therapy.

Prescriptions written by New Brunswick psychiatrists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

RABEPRAZOLE (PARIET)

Tablets 10mg

See criteria under Proton Pump Inhibitors

RALOXIFENE (EVISTA)

Tablets 60mg

For the treatment of post-menopausal osteoporosis when hormone replacement therapy (HRT) is declined, not tolerated or contraindicated.

Osteoporosis is defined as a bone mineral density (BMD) at least 2.5 standard deviations below the young adult mean (T score ≤ -2.5) and/or the presence of osteoporotic fractures. (World Health Organization definition).

REPAGLINIDE (GLUCONORM)**Tablets 0.5mg, 1mg and 2mg**

For patients with type 2 diabetes who are not adequately controlled by diet and exercise and glyburide and/or metformin or who have frequent or severe hypoglycemic episodes despite dosage adjustment of glyburide.

RIBAVIRIN 200mg capsules/interferon alfa-2b injection (REBETRON)**Capsules 200mg**

Requests will be considered from internal medicine specialists for the treatment of chronic hepatitis C (HCV RNA positive)

- Initial coverage of 24 weeks will be approved for all patients. Coverage for an additional 24 weeks will be approved for patients with HCV genotype 1.
- A positive HCV RNA assay after 24 weeks of therapy is an indication to stop treatment.
- Interferon monotherapy should be reserved for patients who cannot tolerate ribavirin.

RIFABUTIN (MYCOBUTIN)**Capsules 150mg**

Requests will be considered for the prophylaxis of disseminated Mycobacterium avium complex (MAC) disease in the following beneficiaries:

- a) HIV infected patients with an AIDS defining diagnosis and CD4+ cell count less than or equal to 200/mm³.
- b) HIV positive patients without an AIDS defining diagnosis and CD4+ cell count less than or equal to 100/mm³.

RISEDRONATE (ACTONEL)**Tablets 5mg and 30mg**

1. For the treatment of Paget's disease.
2. For the treatment of osteoporosis when hormone replacement therapy (HRT) is declined, not tolerated or contraindicated.

Osteoporosis is defined as a bone mineral density (BMD) at least 2.5 standard deviations below the young adult mean (T score \leq -2.5) and/or the presence of osteoporotic fractures. (World Health Organization definition).

RISPERIDONE (RISPERDAL)**Tablets 0.25mg, 0.5mg, 1mg, 2mg, 3mg and 4mg**

1. For the management of manifestations of schizophrenia and related psychotic disorders. Advice from a psychiatrist is suggested prior to starting therapy.
2. For use in severe dementia for the short-term symptomatic management of inappropriate behavior due to aggression and/or psychosis.
(Risperidone 0.25mg, 0.5mg, 1mg tablets are regular benefits of Plans A and V).

Prescriptions written by New Brunswick psychiatrists do not require special authorization. Subsequent refills ordered by other practitioners will not require special authorization.

ROFECOXIB (VIOXX)**Tablets 12.5mg & 25mg**

For the treatment of osteoarthritis in patients who have at least one of the following factors:

- Past history of ulcers
- Concurrent warfarin therapy
- Concurrent prednisone therapy
- Failure or intolerance to at least two other NSAIDs (e.g. ibuprofen, diclofenac, naproxen)

Recommended maximum daily doses: 25mg for osteoarthritis

Note: Rofecoxib is a regular benefit for beneficiaries age 65 and over (Plans A,V).

ROSIGLITAZONE (AVANDIA)**Tablets 2mg, 4mg and 8mg**

For patients with type 2 diabetes who are not adequately controlled by diet, exercise and drug therapy. Drug therapy should include a trial of sulfonylurea and metformin, alone and in combination, unless one of these agents is not tolerated or is contraindicated.

SALMETEROL/FLUTICASONE (ADVAIR DISCUS)**Discus 50/100mcg, 50/250mcg and 50/500mcg**

For patients with reversible obstructive airways disease who are

- Stabilized on an inhaled corticosteroid and a long-acting B2 agonist, or
- Using optimal doses of inhaled corticosteroids but are still poorly controlled.

SALMETEROL XINAFOATE (SEREVENT)**Metered Dose Inhaler 25mcg/actuation, Diskus 50µg**

Indicated in patients, 12 years of age or older, with reversible obstructive airway disease who are using optimal corticosteroid treatment, but are still poorly controlled.

SIROLIMUS (RAPAMUNE)

Oral Solution 1mg/ml

- Rescue therapy in solid organ transplant for patients with refractory rejection on Neoral/MMF/prednisone (NMP) or tacrolimus/MMF/prednisone (TMP).
- Prophylaxis for acute rejection in solid organ transplant when a patient is unable to tolerate NMP or TMP combinations as a result of, or in anticipation of, adverse effects.

Note: These criteria are used at the Queen Elizabeth II Health Sciences Centre. Criteria used by other referring transplant centres will be considered.

SUMATRIPTAN (IMITREX)

Nasal spray 5mg and 20mg, Tablets 100mg and Inj 6mg

1. For the treatment of migraine headache where patients have a definite diagnosis of migraine with or without aura based on the current Canadian guidelines.
2. The initial approval for persons not previously treated with a 'triptan' will be limited to a quantity equal to three days of therapy per month at the maximum dose for two months. If therapy has been successful, special authorization could be renewed for a period of up to 12 months.

Note: Patients experiencing three or more severe migraine attacks in one month should be considered for migraine prophylaxis therapy.

Special authorization for the products naratriptan 1mg and 2.5mg tablets, sumatriptan 100mg tablets, sumatriptan 20mg nasal spray and zolmitriptan 2.5mg tablets will be considered as a set. Approvals will include all products in this list, however reimbursement will be available for a maximum quantity of one agent per month.

TACROLIMUS (PROTOPIC)

Ointment 0.03%

For children over 2 years of age with refractory atopic dermatitis. Approvals will be given for up to twelve months at a time.

TAMSULOSIN HYDROCHLORIDE (FLOMAX)

Sustained-Release Capsules 0.4mg

For the treatment of benign prostatic hyperplasia (BPH) in patients who have experienced treatment failure or intolerance to alternative agents (e.g. terazosin, doxazosin).

TELMISARTAN (MICARDIS)

Tablets 40mg and 80mg

For the treatment of hypertension in patients who require an ACE inhibitor but cannot tolerate it due to side effects.

TERBINAFINE HYDROCHLORIDE (LAMISIL and generic brands)

Tablets 250mg

1. Treatment of onychomycosis
 - approval limits payment for 6 weeks for the treatment of fingernail mycosis
 - approval limits payment for 12 weeks for the treatment of toenail mycosis.
2. Treatment of dermatophyte infection unresponsive to other treatments or unlikely to respond to other treatments due to the site or severity of the infection.

TIZANIDINE (ZANAFLEX)

Tablets 4mg

For the treatment of patients with spasticity caused by traumatic brain injury, multiple sclerosis, spinal cord injury or stroke in whom baclofen or diazepam are not indicated, ineffective or not tolerated.

TOBRAMYCIN (TOBI)

Solution for inhalation 300mg/5ml

For the treatment of cystic fibrosis patients who do not tolerate injectable tobramycin when used for inhalation.

TOLTERODINE (DETROL)

Tablets 1mg and 2mg

1. Treatment failure with oxybutynin
2. Discontinuation of oxybutynin due to intolerable adverse effects

TRAVOPROST (TRAVATAN)

Ophthalmic solution 0.004%

For the reduction of intraocular pressure in patients with open angle glaucoma or ocular hypertension who are intolerant of, or insufficiently responsive to, another intraocular pressure (IOP) lowering drug.

If the beneficiary has had a claim for a first-line glaucoma agent (eg. betaxolol, levobunolol, timolol, etc.) in the previous 12 months, the claim for Travoprost will be automatically reimbursed.

TRETINOIN (VESANOID)

Capsules 10mg

For the induction of remission in acute promyelocytic leukemia (APL) in previously untreated patients as well as in those who have relapsed after, or were refractory to, standard chemotherapy.

TRYPTOPHAN (TRYPTAN and generic brands)

Capsules 500mg; Tablets 250mg, 500mg, 750mg and 1g

As an adjunctive therapy for drug resistant bipolar affective disorder.

URSODIOL (URSO)

Tablets 250mg

For the management of cholestatic liver diseases, such as primary biliary cirrhosis.

VALACYCLOVIR (VALTREX)

Caplets 500mg

For the treatment of acute herpes zoster (shingles): 1g (2 caplets) TID x 7 days.

- Therapy should be initiated within 72 hours of onset of rash. The drug has little benefit if started after 72 hours

Prescription claims submitted by pharmacies which meet the following conditions are automatically reimbursed and do not require special authorization.

- Beneficiaries 50 years of age and older. Persons in this age group have a higher incidence of post-zoster pain.
- Annual quantity limit of 21, 000mg (21 doses of 1g).

VALSARTAN (DIOVAN)

Capsules 80mg and 160mg

For the treatment of hypertension in patients who require an ACE Inhibitor but cannot tolerate it due to side effects.

VIGABATRIN (SABRIL)

Tablets 500mg, Sachets 500mg

1. Requests will be considered for:
 - a) the adjunctive management of epilepsy which is not satisfactorily controlled by conventional therapy.
 - b) initial monotherapy for the management of infantile spasms.
2. The maximum approved dose will be 4g/day

ZOLMITRIPTAN (ZOMIG)

Tablets 2.5mg

ZOLMITRIPTAN (ZOMIG RAPIMELT)

Tablets 2.5mg

1. For the treatment of migraine headache where patients have a definite diagnosis of migraine with or without aura based on the current Canadian guidelines.
3. The initial approval for persons not previously treated with a 'triptan' will be limited to a quantity equal to three days of therapy per month at the maximum dose for two months. If therapy has been successful, special authorization could be renewed for a period of up to 12 months.

Note: Patients experiencing three or more severe migraine attacks in one month should be considered for migraine prophylaxis therapy.

Special authorization for the products naratriptan 1mg and 2.5mg tablets, sumatriptan 100mg tablets, sumatriptan 20mg nasal spray and zolmitriptan 2.5mg tablets will be considered as a set. Approvals will include all products in this list, however reimbursement will be available for a maximum quantity of one agent per month.
